Projects

Indoor Navigation System

Sept. 2024 – Present

Intuitive navigation solution for railway stations

- Directed an innovative mobile-first navigation system leveraging both Ionic and Angular tools; findings revealed solutions addressing critical drop-off points during usage led to boosted customer satisfaction among passengers accessing services seamlessly.
- Integrated Leaflet and OpenStreetMap for interactive 3D mapping and real-time routing with a custom engine in Go.
- Implemented accessibility features, including voice guidance and AR, to enhance user experience for all passengers.
- Gained valuable experience in full-stack development, data management with SQLite, and open-source collaboration.

Real-Time Large File Transfer

Oct. 2024 - Present

Efficient and Secure Peer-to-Peer File Transfer System

- Engineered a high-speed, peer-to-peer file sharing platform optimized for real-time, large-scale data transfer with up to 40% increased efficiency and reduced server dependency.
- Designed and implemented a custom handshake protocol ensuring secure and seamless direct data routing between clients, eliminating bottlenecks and lowering server load.
- Upgraded user experience with a streamlined UI, emphasizing ease of connection for non-technical users.

Open Learn

Feb. 2024 – Jun. 2024

Free Platform for Teachers: Teach, Sell Courses Without Fees

- Engineered a cutting-edge education platform utilizing a tech stack of Angular, Express, TypeScript, MongoDB, and ytdl-core, boosting profitability for teachers by 20% through optimized competitive pricing strategies.
- Established** a cost-effective platform that **reduces** fees for educators.
- Live Preview:** open-learn-frontend.vercel.app

Achievements

- Coding Profile:** Solved 250+ questions across GFG. & 1650+ Rating @hackerrank (5 star (sql), 3 star (python), 3 star (C))
- Hackathons:** Achieved finalist status in several prestigious hackathons, showcasing innovation and technical proficiency in developing real-world solutions under competitive time constraints. Collaborated in cross-functional teams to design and present projects addressing complex, real-world challenges, earning recognition for creativity and execution.
- MOOC Certifications:** Prompt Engineering, DSA & DA from Coursera; DSA in C++ from Cipherschools; Competitive Programming from Hitbullseye; Introduction to MongoDB from MongoDB

Skills

- Programming Languages:** C, C++, JavaScript, Java, Python, Typescript
- Frontend Technologies:** HTML, CSS, Angular, React, Bootstrap
- Backend Technologies:** Nodejs, Express, Typescript
- Database Management:** MySQL, Oracle SQL, PostgreSQL, MongoDB

- **Version Control:** Git, GitLab, GitHub
- **Others:** RESTful APIs, Responsive Design, Prompt Engineering, Generative-AI
- **Soft Skills:** Leadership, Public Speaking, Teamwork, Responsiveness

Education

Lovely Professional University	Kapurthala, Punjab
<i>B.Tech, CGPA: 8.3</i>	<i>Aug. 2022 – Jul. 2026</i>
Primus public school	Muzaffarpur, Bihar
<i>Percentage: 75.6%</i>	<i>2021</i>
Primus public school	Muzaffarpur, Bihar
<i>Percentage: 80.4%</i>	<i>2019</i>
